

Biography

Professor Monèm JEMNI

A well-established and one of the world leading authorities in sport science with 24 years career between France, the USA, Qatar, Germany and mostly in the UK. He is currently a consultant and tutor at the University of Cambridge, UK and a Professor of Neurophysiology at the Carrick Institute of Neuroscience, Florida, US.

Monèm is the Chair Founder of the ISafa (International Science And Football Association www.isafa.info), a network currently relegated in 28 countries that provides quality-controlled scientific, educational and research programs that socially and academically impact individuals, football practitioners, and key stakeholders.

He is an exercise physiologist who gained world recognition as a result of cutting edge research applied to sports. He published over 150 manuscripts including original research, a bestseller textbooks and conference proceedings and abstracts. He is a specialist in health and exercise science with a research focused on the optimization of human performance, via cross-disciplinary orientated projects. He provided services to Olympic Winners and professional football clubs in the UK, such as Arsenal FC, Charlton Athletic, West Ham United, Crystal Palace and Gillingham FC. Monèm acted as the Director of the Sport Science with Professional Football Coaching Degree at the University of Greenwich, London (2008-12). He transformed the programme to a wider international course and publicized it worldwide. He also acted as the Chair of the Qatar Olympic Committee Sport Science Programme based at Qatar University 2014-18.
